# Philmac Compression Fittings

Marley Pipe Systems is proud to have been appointed as the authorized agent for the Philmac (Australia) range of compression and transition fittings. These fittings are available in sizes from 16 – 110mm and have a maximum operating pressure of 16 bar at 20°C.

Philmac is renowned for quality products and services. Their compression fittings comply with the requirements of a number of Australian specifications and, in South Africa, have a Certificate of Acceptance from JASWIC.

The Philmac fitting design uses the mechanical advantage of the nut thread to place the seal into a compressed position. This means no resistance when inserting the pipe into the fitting, thus eliminating damage or displacement to the seal during installation. Furthermore the fittings have no loose components which can be incorrectly assembled or lost.

Couplings 16mm to 110mm  
Slip Couplings 20mm to 63mm

Reducing Couplings  
20mm x 16mm to 110mm x 90mm

Male Adaptors
